

S.R.B

Super Scale Series eurocopter EC145

Rotor head

Bell / Hiller fixed pitch rotor head from Quark. Main blade and stabilizer is fixed at acute angle. This single rotor design is very stable and easy to control. (International patent pending)

Stabilizer

Stabilizer blades use rubber material to minimize crash damage.

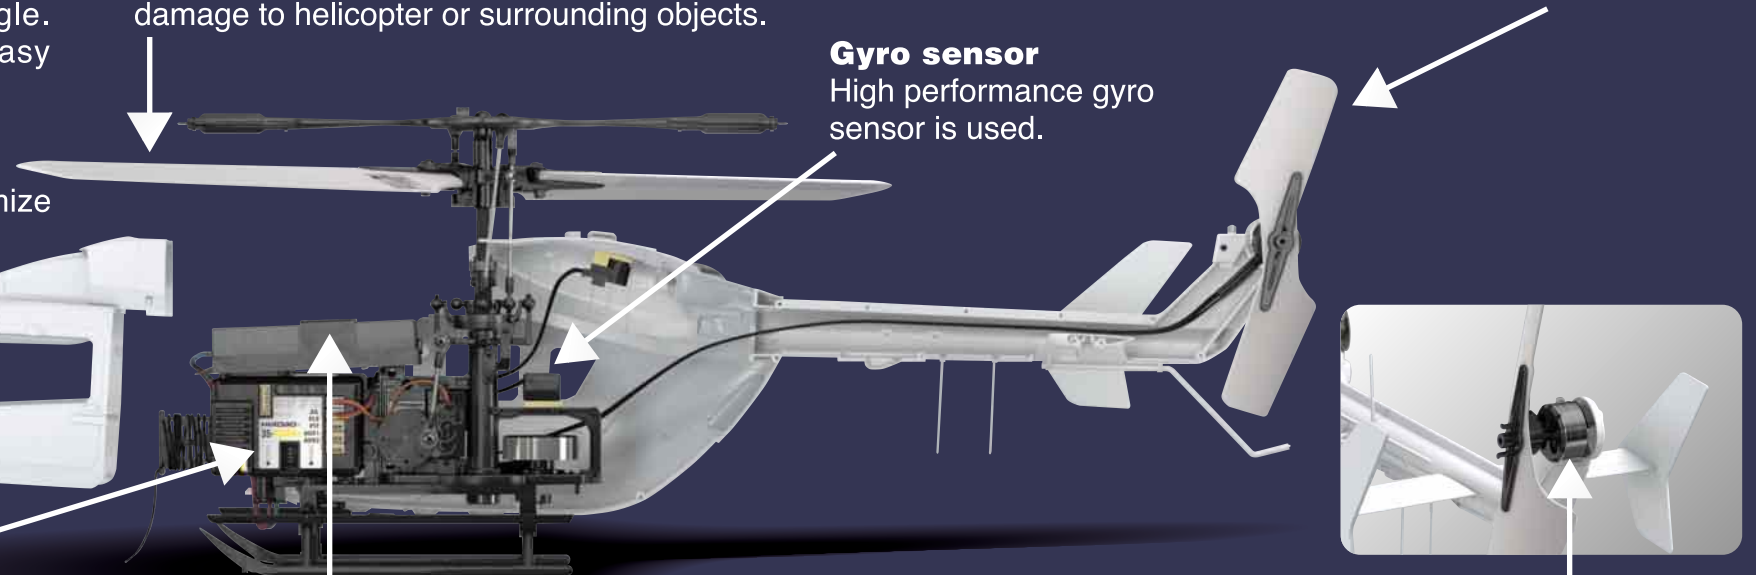

Main blades / tail blades

Both blades are made of foam for safety in mind. When the helicopter crashes, foam blades break to minimize damage to helicopter or surrounding objects.

Gyro sensor

High performance gyro sensor is used.

S.R.B SG control unit

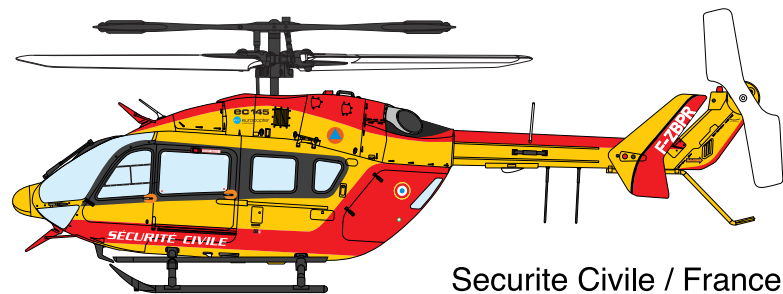

All in one unit including receiver, gyro, motor, ESC.

SG Lithium polymer battery

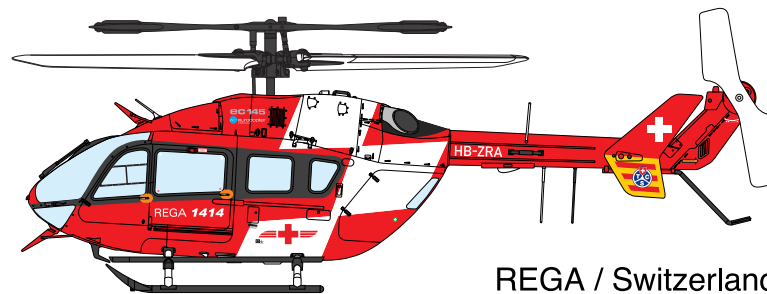

3S 11.1V battery with plastic case for more powerful flight. The charger included in this set can balance charge each cells.

Direct tail motor

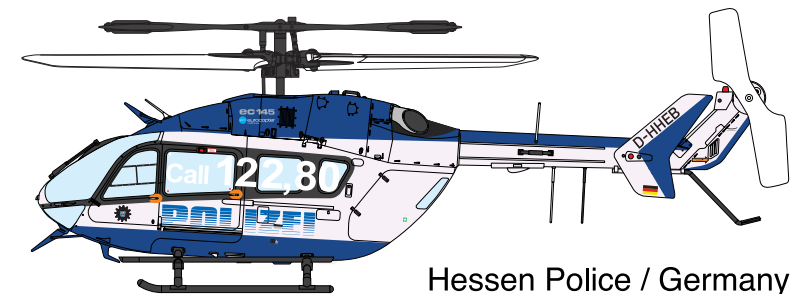

SG brushless tail motor used. Direct motor can run more smoothly without power loss.
